What's New In AutoCAD?

Feature enhancements AutoCAD 2023 supports industry-standard manufacturing and engineering file formats, including advanced text and graphics, color and measurement workflows, and high-quality raster images and animations. AutoCAD Scripting: Release 2023 includes the beta version of the new Script Window. Use the Script Window to script design and procedural activities and to call commands and create custom functions. Use Script Window commands to work with a design set or data within a DSC file. In addition to the standard command set, Release 2023 adds 50 new commands to meet design and procedural needs. This enables developers to use the Script Window and associated commands as a lightweight replacement for many traditional user interface commands. On-screen visualizations: A new feature that enables you to create and edit graphical parameters in context. With Visualize Parameters, you can use the Script Window to create a visualization from a set of parameters. You can then visually edit the parameters and see the impact on the visualizations.
