
Winsoft JavaImport For Android 3.6 Full Source

[Download](#)

Winsoft JavaImport for Android 3.6 Full Source. Converts Java .jar files, .class files and folders into Delphi/C++ Builder modules for Android. The Drag&Drop method is used to find the module, which

allows you to quickly import. If you have rights to install in the system, you can install the program and import all the necessary modules. The program can import .js and .asm files for Android. You can create new modules for the needs of your program in the form of source files. The program is completely Russified. 32 and 64-bit processors are supported. There is per-module customization.
