Morphine is widely used in the treatment of severe pain due to cancer in children. The pharmacokinetics of morphine in children are poorly understood. Currently available analytical assays are unsuitable for determining pharmacokinetic parameters in children. This study describes the development and validation of a sensitive assay for therapeutic drug monitoring of morphine in blood, plasma and dried blood spots (DBS). A tandem mass spectrometry-mass spectrometry (MS-MS) assay was developed for the determination of morphine and its metabolites in blood and plasma. The validation was performed according to the relevant guidelines and regulations, and the assay was used to determine the pharmacokinetics of morphine in pediatric cancer patients. The assay was linear ($R(2) \geq 0.99$)

, Fuzzy Duck and David are all cleaning up, I don't know how to clean up, and Jeff is starting the engine. This car is a 100 buck rendition of 1978 Camaro. You got a ride home? No, I don't. I got a bus. You don't? It's over there, or maybe it's across the road. It might be. As we look back on the event, there were miles of 1/4 mile donated by sponsors, and we did both Red Diamond 1/4 mile shows. This is a little different from a normal RMS. Lots of people from Woodridge and people from the hospital. And it's about raising money for the hospital, too. And it's about helping Jim McGuire and his family. So it's been a great fit so far. I really enjoy being a part of this and having Jim
